EDUCATION

Dwarkadas J. Sanghvi College of Engineering

Bachelor of Technology in Computer Science, CGPA: 8.88

Mumbai, Maharashtra

August 2023 – June 2027

SVKM's Mithibai College of Arts

HSC – Maharashtra Board, PCM: 89.67

Mumbai, Maharashtra

August 2021 – May 2023

ACHIEVEMENTS

- Achieved **AIR 6934** in **JEE Main 2023** with **99.4 percentile**, ranked in top **0.6%** of **11.13 lakh** candidates.
- Secured **AIR 11640** in **JEE Advanced 2023**, among the top **6.5%** of **1.8 lakh** qualified aspirants.
- Scored **99/100** in Operating Systems, among the highest in a batch of **206** Computer Engineering students.
- Won **1st Place** at **HackX 2.0 (top 0.1%, 1,300+ participants)** - SubTerra AI, GIS-based excavation platform.
- Reached **CodeChef 3-Star** (Max rating: **1627**), outperforming over **90%** of 180,000+ active coders globally.

EXPERIENCE

Nomura | *IT Intern*

July 2026 – Present

- **Modernized 152K+ LOC** across **4 intraday services** from **Java 8, Spring Boot 2.1** to **Java 21, Spring Boot 3.5**, including legacy messaging migration (**TIBCO** → **Solace**).
- Migrated **Jenkins** pipelines to **GitLab**, reducing average pipeline execution time by **40%** across **10+ projects**.
- Built **Graphify** knowledge graphs across **10+ projects**, reducing LLM context/token usage by **70%** and automating index updates on every merge to **master**.
- **Remediated** Nexus IQ security debt across **4 enterprise repositories**, cutting critical vulnerabilities by **91%** (**284**→**25**) and severe by **74%** (**1,616**→**422**).
- Delivered **Power BI** dashboard for a company-wide survey with **50+ columns**, streamlining data visualization.

Prism | *Co-Founder (Tech)*

September 2025 – Present

- Leading backend architecture for an AI based image sharing app serving **50+ users** across **20+ countries**.
- Designed cloud infrastructure on **AWS (EC2, S3)**, **Cloudflare**, and **Supabase** with **99.93% uptime**.
- Scaled storage pipeline to handle **1,000+ images** with secure cross-service integrations and low-latency delivery.
- Led system design and deployment, reducing inter-service latency by **30%** through architecture optimizations.

PROJECTS

SnapLink | *Spring Boot, Kafka, Redis, PostgreSQL, Prometheus*

August 2025 – January 2026

- Architected URL shortener **2.8M redirects/day** with **98.9% success rate** under 10K concurrent requests.
- Achieved **100% cache hit rate** with Redis for popular URLs, eliminating database calls with sub-ms lookups.
- Designed Kafka async pipeline processing **2,857 events/sec**, reducing database operations by **95%**.
- Added Prometheus monitoring with Grafana dashboards tracking real-time system health and click analytics.

Viper | *C, Epoll, Makefile, ApacheBench*

July 2025 – August 2025

- Constructed modular HTTP server in C with routing and middleware, handling 50k+ concurrent requests.
- Implemented epoll-based event architecture, reducing response time from **40s to 3.9s** (ApacheBench).
- Optimized parsing and networking, improving accuracy and browser compatibility.

NutShell | *C, POSIX, GNU Readline, Makefile*

June 2025 – July 2025

- Engineered Unix shell in C supporting pipelines, conditional operators (**&&**, **||**), and I/O redirection (**>**, **>>**, **<**).
- Implemented process control using **fork()**, **exec()**, **wait()**, and file descriptor management via **dup2()**.
- Structured modular architecture with syntax parsing, environment variable handling, persistent history, and scripted build system.

InternConnect | *Next.js, FastAPI, PostgreSQL, LangGraph, Supabase*

April 2025 – June 2025

- Built scalable internship platform enabling structured student–faculty collaboration and opportunity discovery.
- Integrated WebSocket-based real-time chat and **LangGraph** multi-agent chatbot for query automation.
- Created self-triggered Excel export pipeline for enrollment tracking, saving **30–40 min** per batch.

TECHNICAL SKILLS

Programming & CS Fundamentals: Java, Python, C, Data Structures, Algorithms, Object-Oriented Design

Web & Frameworks: JavaScript, HTML/CSS, React.js, Vite, Spring Boot, Spring JPA, Spring Security, FastAPI

Databases & Cloud: PostgreSQL, MySQL, MongoDB, Supabase, Firebase, ChromaDB, Vercel, Render

GenAI & LLMs: LangChain, LangGraph, MCP (Basics), HuggingFace, LLaMA, Gemini, Grok, DeepSeek

Devops & Messaging: Docker, Git, GitHub, Nginx, AWS (EC2, S3), Jenkins, SonarQube, Kafka, Zookeeper, Redis

Dev Tools & Knowledge: Postman, VS Code, Google Colab, IntelliJ IDEA, Machine Learning, REST APIs
